

Ethos CA10i is an ultra compact installation specific fixed angle array enclosure suited to a wide range of applications. With horizontal coverage of 90° and vertical coverage of 10°, the cabinet contains an 8" Neodymium cone driver which is passively combined with two waveguide mounted 1" Neodymium compression drivers. With a cabinet impedance of 16 ohms a multi cabinet system can be driven from a single amplifier channel. Each box has a central connection point which enables cabinets to be quickly and easily bolted together with a link bar. Applications for Ethos CA10i include church, theatre and discotheque installation or as a side hang for the bigger brother Ethos VA. Ethos CA10i can be used for vocal reproduction without the need for bass support or combined with the Nd115 or Nd215 bass cabinets when bass support is required. Either cabinet can be flown above an array using the Ethos CA fly frame. It is intended that Ethos CA cabinets will be used in a minimum configuration of two cabinets.
